

OTHER MATERIALS

MURANO GLASS CHARMS

The glass used for PANDORA glass charms is imported from the Venetian island of Murano in Italy. The charm is hand-finished according to the authentic Murano production method by skilled craftsmen at our factories in Thailand. The cores are made of either sterling silver or 14K gold and the charms are hand-finished.

As a characteristic of the production method, each of the glass charms is unique and they can contain small variations in the design. These variations are in no way to be considered a fault of the product.

WOOD BEADS

PANDORA wood beads are produced by the Rainforest Protection Initiative under the Canopy Wood guidelines to ensure tropical rainforest protection through certified sustainable forestry. The wood beads are made from resilient timbers and are protected by layers of lacquer which enhance the durability of this natural product. However, organic products are delicate and should be handled with care.

Do not expose the wood beads to contact with chemicals, perfume, creams, soaps or silver polish as this will strip or discolour the protective lacquer. Avoid contact with abrasive or rough surfaces. Wood beads should never be worn in the bath or be submerged in water. Never clean them in an ultrasonic cleaner. For daily care, simply wipe the wood part with

a soft cloth, going with the grain. To clean, wipe the wood bead with a soft cloth which has been dampened in the suds of soapy water. Wipe with a dry cloth.

LEATHER

Leather is a natural product that will benefit from careful protection. Do not use in water. Gentle shading and natural variations may occur and are merely natural features of leather.

Use PANDORA leather chains with a maximum of 7-9 charms.

COTTON

PANDORA cotton strings are 100% cotton with wax coating and 14k gold endings.

Natural man-made fibres may change appearance when worn. Do not use in water.

POLYESTER

PANDORA fabric strings are made of 100% synthetic fibres, with 925 sterling silver endings.

The product may change appearance when being worn. Do not use in water.
