

PANDORA GROUP TAX POLICY

UPDATED AND APPROVED BY BOARD OF DIRECTORS MARCH 2023

1 INTRODUCTION

Being a leader within sustainability is an important foundation for Pandora's growth journey.

We anchored sustainability firmly in the way we manage Pandora. We have formalised sustainability oversight at Board level, introduced sustainability targets as part of the remuneration package for our senior leaders, and elevated the leadership of our sustainability teams to reflect their strategic importance. We continue our commitment to the United Nation's Global Compact.

Our sustainability strategy is also reflected in our approach to taxes and we consider tax to play a key role for societies and an important contribution in order to reach the goals of the global sustainability agenda. Therefore, we aim to pay a fair tax in all the markets where we operate.

Pandora's values expressed in our Code of Conduct is the foundation for our approach to tax management. Pandora's commitment to ethical business practices means that we conduct business lawfully, appropriately and with honesty and integrity by adhering to applicable laws and regulations, exercising sound judgment and taking actions to minimize our environmental impact on the planet.

The purpose of our tax policy is to establish a clear and aligned tax approach to all transactional, reporting and compliance aspects of Pandora. The policy applies to all entities in the Pandora Group.

2 TAX APPROACH

Pandora operates globally under a vertically integrated business model, and we own a significant part of our value chain from production to retail. Pandora's transfer pricing policy follows a so-called principal tax model, where profit follows risk and value creation throughout the value chain. While all steps of the value chain are important to Pandora, Pandora A/S is the principal value driver, including assuming the majority of business risks. Pandora allocates a profit margin, based on benchmark studies, to entities in the Group and the residual profit (or loss) in the value chain remains with Pandora A/S.

3 TAX GOVERNANCE

The Board of Directors are responsible for the tax policy as we believe tax is a core part of corporate responsibility. The responsibility for tax risk management lies with the Group CFO and is overseen by the Audit Committee.

The Audit Committee makes an annual review of the tax policy to ensure clarity about Pandora's attitude to tax, significant tax strategies and handling of tax issues.

To execute on the daily tax operations Pandora has a specialized tax function that is part of the Group CFO organization. The tax function is organized as a global function to ensure we have a consistent and global tax strategy, tax policies and processes, but relies on local expertise when appropriate.

4 TAX RISK MANAGEMENT AND TAX PLANNING

With a principal tax model, Pandora by nature has a significant number of intercompany transactions. All intercompany transactions are based on arm's length standard and therefore priced on a basis consistent with the way unrelated parties would have priced such transactions.

Pandora will only implement structures that are driven by commercial strategy, and we will refrain from unnecessarily complex tax set-ups. This results in a simple and business aligned model which is well understood and based on in-depth analysis of the tax impact.

Where the tax impact is subject to interpretation, we leverage the expertise of external tax advisors when making tax decisions.

Pandora has established a Tax Control Framework (TCF) for corporate income taxes, customs, VAT and other indirect taxes, transfer pricing, tax accounting and withholding taxes. The TCF is established to ensure that processes and controls are in place and that these are effective and being followed in practice. The TCF is a dynamic process which adapts to changes in the regulatory environment and expands and improves as more insight is gained.

5 TAX INCENTIVES

Pandora will consider government sponsored tax incentives where appropriate and in line with our Code of Conduct to support economic development, transfer of knowledge, creation of employment and maintaining good corporate citizenship.

Thailand provides tax incentives to foreign companies that invest in Thailand under the so-called Board of Investments (BOI) scheme.

Pandora's production facilities are located in Thailand and approximately 14,000 people are employed at Pandora's three facilities in the country. Our investments and business in Thailand are eligible for tax privileges under the BOI. The BOI privileges are temporary reductions for corporate income tax on in-house production and customs duties on import plus other non-tax privileges.

6 TAX HAVENS

Pandora does not avoid taxes or exploit the lack of transparency and information exchange by operating in tax havens. We use the OECD definition of tax havens, and as of 31 December 2022 we have two companies in the Pandora Group located in a tax haven (Panama).

One of the companies has acted as the regional office for all of Latin America since 2017. The approximately 60 people provides services such as marketing, HR and merchandizing on behalf of Pandora A/S to our group entities in the region and receive a standard arm's length service fee for this activity. The other company is established in 2022 and holds the retail business in Panama. End of 2022, the company owns 2 Pandora stores and the profit margin is in line with Pandora's other distributor subsidiaries and taxed in Panama. The profit in Panama is less than 0.1% of Pandora's total profit.

7 TRANSPARENCY

Pandora understands the need for more transparency by both taxpayers and tax administrations, and the need to provide more clarity about Pandora's position on tax.

We provide regular information about our approach to tax and taxes paid to our stakeholders, including investors, policy makers, employees and the general public.

Pandora communicates openly about our tax payments and tax contributions in the societies where we operate. Pandora publishes country-by-country information for all the markets where we are present, and the information is based on the EU Directive¹ for country-by-country reporting.

8 RELATIONSHIP WITH TAX AUTHORITIES

Pandora is committed to maintain a good and constructive relationship with all relevant tax authorities. We are open and transparent and respond to relevant tax enquiries in a straightforward and timely manner. We balance the necessary respect for confidential business information with our general aspiration to communicate openly with the tax authorities in all countries where we operate.

Pandora seeks dialogue and agreements with tax authorities in order to increase predictability and minimize the risk of double taxation and tax disputes. Pandora is open for applying for Advance Pricing Agreements (APAs) when it seems relevant and meaningful.

¹ Directive (EU) 2021/2101
